LEARNING FILIPINO DIALECTS

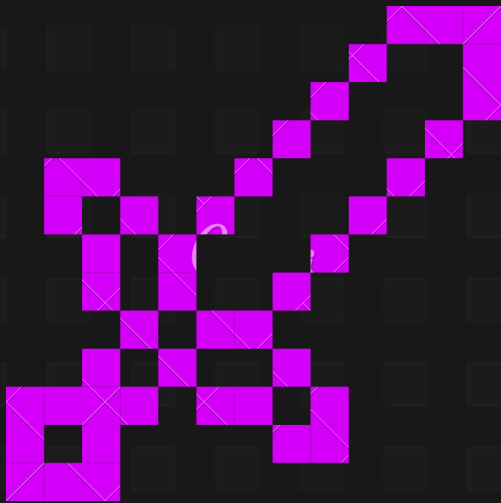

WHAT IS WIKA WARRIOR?

Wika Warrior is an RPG Battle game that aims to teach players different Filipino dialects in an interactive manner.

Along with teaching the different dialects, we hope the players gain an appreciation for the Philippines' diverse culture.

TARGET AUDIENCE

The game is targeted towards students, in hopes that it can be used as a learning tool in schools to further their knowledge in the Philippines' diverse cultures and multitude of dialects.

100+ DIALECTS

1 PHILIPPINES

INCLUSIVE COMMUNITIES AND CULTURES

There are over a hundred different dialects spoken in the Philippines. The game aims to highlight and give awareness the diverse cultures in the country.

The game takes players on a trip to different regions of the Philippines. While our languages have slight differences, it's not as difficult to learn because the words are still closely related.

EMPOWERING COMMUNITIES AND CULTURES

Through this game, we are providing an avenue for different cultures to be recognized, therefore empowering different communities.

Words have power, and while in this case the game gives the notion that words can be used as an attack, it also shows that an understanding of one another's language can help one gain an advantage and power, whereas not understanding leads to failure.

CULTURAL APPRECIATION

Compared to other countries, the Philippines is small in size, but there is cultural diversity in every corner you turn. There's a beauty in having all these cultures in a small place, but still being able to unite as one country.

We hope the game serves as an avenue for players to learn as well as see the different cultures present in the country, and eventually gain an appreciation for it and its "unity in diversity."
